

Bransby takes into care sick foal.

Following a telephone call from a concerned member of the public on Saturday 8th October, Bransby Home of Rest for Horses has taken into care two mares and a foal.

The animals, all belonging to an elderly gentleman living in an isolated farm in Herefordshire, who has become too frail to be able to cater for their needs.

Mystique one of the mares had a foal 2 weeks ago. The foal that staff have named Topaz, contracted Pneumonia and was very poorly. She has received Veterinary attention and will continue to be closely monitored to help her overcome this potentially life threatening infection.

The second mare is elderly and in foal so will need specialist care from our dedicated staff to ensure her needs are met.

Fortunately we were notified quickly enough, which has enabled us to react in time before any real suffering has occurred.

The ownership of these animals is now in the safe hands of Bransby Home of Rest for Horses and we will keep you all informed of their progress.
